Scenario 7: rules (page 1)

rule	what	value	units
dynamics.step_min	step length	15.0	min
dynamics.settling_cap_passes	settling cap	100.0	passes
dynamics.trip_point	trip point	0.9	ratio of supply received
reserves.hospital.essential_load_fraction	floor (hospital on generator)	0.6	ratio of normal load
dynamics.threshold	threshold θ (logistic and control edges)	0.5	ratio of supplier state
repair.crew_bound_lead_h	crew-bound lead per job	2.0	h
storm.line_crew_work_h	line work per failure point	6.0	h per failure point
storm.tower_crew_work_h	line work per towered failure point	72.0	h
repair.manual_switching_h	manual switching on site	1.0	h on site
crews.road_speed_kmh	road speed	40.0	km/h
crews.offroad_speed_kmh	off-road speed	2.0	km/h
crews.outlying_island_mobilisation_h	sea-trip mobilisation	12.0	h
reserves.battery_recharge_h	battery recharge, empty to full	12.0	h
reserves.fuel_resupply.lead_time_h	fuel delivery lead time	12.0	h
reserves.fuel_resupply.delivery_h	fuel delivery interval	24.0	h of fuel
reserves.main_refill_rate_fraction	refill from the main, share of drain rate	1.0	ratio of the drain rate
dynamics.horizon_h	horizon	72.0	h
refill: battery	how the stock refills	battery	
refill: generator_fuel	how the stock refills	delivery	
refill: purified_water	how the stock refills	main	
refill: makeup_water	how the stock refills	main	
refill: water	how the stock refills	main	
refill: distribution_water	how the stock refills	pumps	
refill: any other kind	how the stock refills	none
